SECTION 1: Application of Rates and Operating Rights

Rates and provisions named in this publication, or as amended, are limited in their application on interstate, intrastate or foreign commerce to the extent of the operating authority of FedEx Custom Critical, Inc.

Item 10: Over Irregular Routes:

General Commodities

Shipments will be categorized in accordance with the Rate Category applicable for each shipment. Shipments requiring larger equipment than those associated with each Rate Category, due to dimensional characteristics of the cargo, will be rated utilizing the necessary Dimensional Column needed to accommodate the dimensional characteristics. Specifications for non temperature vehicles are as follows:

Rate Category	Weight Capacity	Vehicle Size	Dock High
B	Up to 2,500 lbs.	Typically a cargo van	No
C	Up to 5,000 lbs.	Typically a 12' or 14' straight truck	Yes
D	Up to 13,000 lbs.	Typically a 20' or 22' straight truck	Yes
E	More than 13,000 lbs.	Typically a tractor with a 48' or 53' trailer	Yes

Due to the weights of extra equipment temperature-control trucks are required to carry, these vehicles may not be able to meet the weight capacities listed above.

Note: When dock high equipment is requested or required, pricing for dock high equipment will apply even when shipment characteristics would have been satisfied by a smaller vehicle type.

Section 2: Governing Publications / Programs

Item 50: Governing Publications / Programs
