

Fuel Surcharge:

1. The net line haul charge will be subject to a fuel surcharge as provided below. The amount of the fuel surcharge will be determined by the U.S. National Average On-highway Diesel Price as provided by the U.S. Department of Energy (D.O.E.). The current On-highway Diesel Price may be obtained on the Internet at [Gasoline and Diesel Fuel Update - U.S. Energy Information Administration \(EIA\)](#). The fuel surcharge will be set on Monday of each week and will take effect 00:00:01 Eastern Time of the following Tuesday. Except when a holiday is on Monday, then the National Average is posted on Tuesday. The surcharge that will be assessed will be based on that in effect on the calendar day the shipment is actually picked up. Fuel surcharges will be applied to any/all mileage related charges.
2. Notice of fuel surcharge implementation is exempt from the otherwise established provisions of notice. Fuel surcharges are also exempt from any discounts which may be reflected in individual account agreements. Fuel surcharges will be reflected as a separate line item on freight bills for both parties' accounting requirements.
