

FedEx Freight Space and Pace rates and additional pickup and delivery charges

For shipments from the contiguous U.S. to Canada

Effective January 5, 2026

Contents

Zone-based rates and additional pickup and delivery charges for
FedEx Freight® Priority and FedEx Freight® Economy zones 201–270

How to calculate your rate

To determine FedEx Freight Space and Pace rates, you need a FedEx Freight zone locator, additional pickup and delivery charge tier lists, and the FedEx Freight Space and Pace rate sheet. Go to fedex.com/en-us/shipping/rate-changes.html to download and create steps 1 and 2 below.

You will need space (dimensions), pace (priority or economy), and ZIP codes (origin/destination).

1. Find the zone for your shipment.

Create a zone locator (inbound or outbound) to find the FedEx Freight zone for your ZIP or postal code.

- Within the contiguous U.S.
- From the contiguous U.S. to Canada
- From Canada to the contiguous U.S.

2. Determine if additional pickup and delivery charges apply.

Turn to the applicable contiguous U.S. or Canada additional pickup and delivery charge tier list to find the tier(s) that correspond to your origin and/or destination. Note: If applicable, any additional pickup and/or delivery charges will be calculated as part of your total transportation charges.

3. Find your rate table.

Select the Space and Pace rate sheet for the applicable geography.

- Within the contiguous U.S.
- From the contiguous U.S. to Canada
- From Canada to the contiguous U.S.

4. Rate your shipment.

- Select the rate for the zone identified in step one and add additional pickup and delivery charge tier rates identified in step two (if applicable) to calculate the rate total.
- For each handling unit (HU), calculate the dimensional weight (DMWT) using the dimensions and the dimensional factor, then compare it with the actual weight. The chargeable weight is equal to:
 - DMWT when DMWT > actual weight
 - Average of DMWT and actual weight when actual weight > DMWT
- Refer to your pricing agreement for your dimensional factor.

The chargeable weight of a shipment is equal to the sum of all HU chargeable weights.

- Apply the lower of the chargeable weight rate or the alternative weight rate.
 - **Chargeable weight:** Find the applicable weight range for the chargeable weight, then divide the chargeable weight by 100 lbs. and multiply by the rate per hundred lbs.
 - **Alternative weight:** Find the next-higher weight range and divide the minimum weight for that range by 100 lbs., then multiply the rate per hundred lbs.

Note: Shipments are subject to a tiered minimum charge based on weight: 1–150 lbs. and 151+ lbs.

EXAMPLE:

950 lbs. FedEx Freight Priority shipment from the contiguous U.S. to Canada, Zone 201.

Chargeable weight charges at:
950 lbs. = \$380.57 (950 lbs./100 lbs. x \$40.06)

Alternative weight charges at:
1,000 lbs. = \$261.80 (1,000 lbs./100 lbs. x \$26.18)

Adding 50 lbs. of alternative weight results in a lower overall average charge (\$261.80 vs. \$380.57).

5. Surcharge weight.

When a surcharge is rated by or qualified by weight, the Shipment Chargeable Weight will be used for the qualification and the charge, if charge is determined by weight.

6. Determine fees.

See the [FedEx Freight Space and Pace Service Guide](#) for fees and surcharges that may apply.

7. Freight class.

FedEx Freight Space and Pace rates do not rely on or account for extraneous freight code(s), class(es), classification(s), or itemization(s). Any and all comments or references to freight codes, classes, classifications, and/or item numbers on the Bill of Lading shall have no impact on FedEx Freight Space and Pace rating.

FedEx Freight Space and Pace rates and additional pickup and delivery charges

For shipments from the contiguous U.S. to Canada
